1. Registration Number: 57-V-0001

2/3. Species (common name) & Number of animals used in this study:

Mouse (340)

4. Explain the procedure producing pain and/or distress.

By mistake we included mice on this report, however, laboratory mice are not included in the definition of an "animal" in the AWAR, so please disregard.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

See response above.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):
